

E-mail node

Vyplnime vsetko podla tabulky, ak mame vlastny mailovy server tak samozrejme podla neho. Ak chceme pouzit G-mail, tak treba na stranke <https://myaccount.google.com/> security povolit pristup aj menej bezpecnej aplikacii, bez toho sa to vzdy vrati s chybou.

Sprava potom pride normalnym mailom na adresu **To:** a vyzera tak ako nizsie na priklade.

Name Name

Less secure app access

Your account is vulnerable because you allow apps and devices that use less secure sign-in technology to access your account. To keep your account secure, Google will automatically turn this setting OFF if it's not being used. [Learn more](#)

 On

[Turn off access \(recommended\)](#)
